Active Thermitic Material Discovered in Dust from the 9/11 World Trade Center Catastrophe
[This seminal paper has sometimes been unavailable at the Bentham Open Chemical Physics Journal web site. This is an alternative direct download link.]
<http://911speakout.org/7TOCPJ.pdf>

...article interpreting the significance of the "Active Thermitic Materials" paper by Jim Hoffman
http://911research.wtc7.net/essays/thermite/thermitics_made_simple.html

Brief video description of discovery of nanothermite by Steven Jones
<http://www.youtube.com/watch?v=uaNOKqOpKYU>

Talk by Steven Jones about the nanothermite paper given at UC Davis, May 1, 2009
<http://www.youtube.com/user/DrStevenJonesLecture>

The Top Ten Connections Between NIST and Nanothermites by Kevin Ryan
http://journalof911studies.com/volume/2008/Ryan_NIST_and_Nano-1.pdf

Case Report by the National Institute of Environmental Health Science (Environ Health Perspect. 2010 April; 118(4): 499–504.) identifying carbon nanotubes in the lungs of first responders. These are not found associated with other building fires. The carbon nanotubes were also found in the WTC dust. Production of carbon nanotubes requires high temperatures in the presence of carbon and a metal

catalyst. These conditions are present in the combustion of nanothermite. Kevin Ryan and Niels Harritt have shown that combustion of nanothermite actually produces carbon nanotubes.

Some Misunderstandings Related to WTC Collapse Analysis by Gregory Szuladzinski, Anthony Szamboti and Richard Johns

A disproof of the official explanation for the collapse of the North Tower through mechanical analysis. Published in the International Journal of Protective Structures.

Summary: The energy absorbed by the buckling of the columns would have arrested the collapse within one, or at most two, stories of the onset of collapse. This paper shows the Bazant papers (claiming once initiated, total collapse was inevitable) to have fatal flaws based on unrealistic assumptions.

<http://911speakout.org/wp-content/uploads/Some-Misunderstandings-Related-to-WTC-Collapse-Analysis.pdf>

[Letter by Attorney William Pepper to the Office of the Inspector General of the US Department of Commerce, which oversees NIST + A description of misrepresentations by NIST of the structures that are key to their proposed WTC 7 failure mechanism.](#)

Tony Szamboti and others have been investigating the mechanism NIST asserts caused the collapse of WTC 7. It has been discovered that in order to make their mechanism to work, they needed to deceptively alter their description of the construction details in several ways. These differences show up when NIST's description of their modeling is compared to recently released drawings of the actual structures. The deception is central to an effort to challenge the NIST WTC 7 investigation on legal grounds as being evidence of an intentional coverup. Following the letter, in the same pdf file, is an extensive discussion of the key omissions. This is an ongoing effort.
